### **CLASSIC® Sickersteine fino gefast**

### **CREABETON AG**

<https://creabeton.ch/> | [info@creabeton.ch](mailto:info@creabeton.ch)

**Type:** Stone | Interlocking paver

Der CLASSIC® Sickerstein ist ein wasser- und luftdurchlässiger Betonpflasterstein, der eine Fläche dauerhaft befestigt, ohne sie zu versiegeln. Dem CLASSIC® Sickerstein sieht man seine Offenheit nicht an. Der Eindruck täuscht. Der Sickerstein verfügt über jede Menge kleiner Poren, welche durchschnittliche Regenwassermengen problemlos versickern lassen. Die feinkörnige Oberfläche ist angenehm griffig und bietet einen hohen Geh- und Fahrkomfort.

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
